

## Educational Objectives

Temporomandibular disorder is a rather generic term, describing a multi-faceted condition with a myriad of treatment options.

TMD therapy is sometimes overlooked simply because the clinician lacks confidence in selecting the appropriate appliance.

Through lecture, case presentation and discussion, Drs. Browne and Di Lauri will arm you with the knowledge to prescribe the appropriate appliance for each condition. Learn to recognize the benefits and pitfalls of each type of appliance and to ultimately convert from appliance therapy to definitive treatment of teeth.
